August 14, 2017 – Kenmore, WA – Phase 4 Design, Inc. does it again! Enhanced Tactical Asset Communications (ETAC) allows a smartphone to appear as a radio to an LMR dispatcher.

Developed to be seamlessly integrated directly onto the dispatchers console. Using the ESChat PTT App available on both Android and iOS platforms. This system can be deployed using any cellular carrier, to provide secure and reliable asset communication.

ETAC is highly configurable and the only requirement is an available DMZ with access to the Internet. Installations can include PIM VPN with encryption up to FIPS 140-2, multiple channels of Radio Gateway are available to both a Dispatch Console or a TRC Radio directly.

Additional features include a Cloud Based, Encrypted, PIM VPN Reflection Point known as C.A.R.M.E.N. (Cloud Access Realtime Multicast Encrypted Network) a CARMEN Connection can provide low cost catastrophic backup via the Cellular Network, Satellite or FirstNet directly to a backup radio.

Contact us at 425-402-7308 or email info@phase4.org for more information.
