**Oct 25, 2013 – Kenmore, WA** – Dave Grant, President of Phase 4 Design, Inc. announces an On-Line version of the companies 2 day Boot Camp training class for Telex Radio Dispatch Systems.

This course is a Boot Camp style of training, 2 full days for up to 15 students in a fully multimedia virtual environment. The only requirement is a Web Browser with Flash Player. All attendees have full two-way audio and video. The class includes a headset for each student to participate in group discussions.

By “Boot Camp”, Grant commented, “I mean 2 full days in the classroom, we bring in lunch, we don’t go anywhere”. There is a combination of structured training guide based instruction, as well as interactive discussions during the class on advanced system configurations, including SIP, custom C-Soft intercom setup, DTMF ANI signaling, Serial Controlled Radio, TRBO, etc.

Each student will receive a 3-ring bound manual of all course materials (this is at least 300 pages) as well as a flashdrive with select course material and the current release of Dave’s Toolbox. An analog headset is included to allow the student join into the audio discussions during class. It is also a great headset for testing a console!

*For the current training schedule, a complete course description or to get registered see [www.phase4.org/BootCamp.asp](http://www.phase4.org/BootCamp.asp)*

Phase 4 Design, Inc. is located in the Pacific Northwest, near Seattle, Washington. We have been providing solutions to complex technical problems since 1989. Our nearly 40 years of combined experience in the areas of Two-way Radio / Public Safety / Paging, Telephony, LAN / WAN Network Design and Software System Design, makes Phase 4 Design, Inc. uniquely qualified to support Telex Radio Dispatch System Design, Implementation and Maintenance. Services are available Worldwide.
